PROFILE

Senior backend engineer with 5+ years of experience building Go and PHP/Laravel systems across SaaS, payments, lending, and online learning. Experienced in multi-tenancy, third-party integrations, asynchronous workflows, and production reliability. Work spans architecture, implementation, testing, and deployment, with additional hands-on React/TypeScript development and personal AI projects.

SKILLS

Backend and APIs	Go, PHP (Laravel), REST, gRPC
Frontend	TypeScript, JavaScript, React, Vue.js
Data and messaging	PostgreSQL, MySQL, Redis, RabbitMQ
Infrastructure	Docker, Docker Swarm, Traefik, HashiCorp Vault, Linux
Quality and operations	ELK, Prometheus, Grafana, TDD, Pest, PHPUnit

EXPERIENCE

Simorgh — Senior Backend Engineer · remote — Jan 2025 – Oct 2026

- Simplified an inherited Go/PostgreSQL platform with the technical lead, reducing unnecessary abstractions and improving maintainability and stability.
- Implemented multi-tenancy and tenant-scoped role-based access control for a digital-signature SaaS platform.
- Built ERP integrations importing user and contract data from customer-managed SQL Server, Oracle, MySQL, and PostgreSQL databases, with credentials stored in HashiCorp Vault.
- Built fiat payment and settlement services integrating a third-party provider, with RabbitMQ for asynchronous processing.
- Introduced structured logging, request correlation IDs, ELK log aggregation, and production metrics with Prometheus and Grafana.

INVERSE School — Senior Backend Engineer — Oct 2023 – Sep 2024

- Reworked payment service boundaries and rewrote a PHP payment service in Go; tested it in staging and deployed it to production.
- Integrated and released a third-party BNPL gateway; implemented HTTP idempotency keys, unique transaction IDs, and database locking in payment flows.
- Tested successful and failed transactions, idempotency, and backward compatibility using mocked payment gateways.
- Deployed Go and PHP services on self-managed Linux infrastructure using Docker Swarm and Traefik.

Startup Studio Octa — Senior Backend Developer — Aug 2021 – Oct 2023

- Owned backend design and development for LandPay, building the lending product from scratch with Laravel, MySQL, and Redis.
- Collaborated with product managers and designers on merchant onboarding, KYC, credit packages, B2B workflows, payments, and data models.
- Used TDD and developed Pest/Laravel tests covering lending, wallets, payments, installments, and authorization scenarios.
- Designed and developed the backend for Sepehrino, a crowdfunding platform.

ModaresaneSharif.ac — Backend Developer — Oct 2020 – Oct 2021

- Built Laravel commerce and online-learning functionality, integrating BigBlueButton for browser-based classes.

PROJECTS

- **Fitness AI agent:** Developed an agent to evaluate diary entries, meals, workouts, and activity records and report insights.
- **E-commerce application:** Developed a web application using React and TypeScript.
- **Sivi and Mentup:** Co-built and published Sivi, a new-tab browser extension, and built Mentup; used OpenAI and AI coding agents during product development.

EDUCATION

Associate Degree, Software Engineering · Shamsipour Technical and Vocational College · 2019 – 2023
Diploma, Computer Programming · Technical College of Ahrar · 2016 – 2019

Languages Persian (native) · English (upper-intermediate, B2)
